

# Cart with hay bales

For the hay bales, cut the parcel string or other string into short pieces.

A strip on a work mat

Stick on double-sided adhesive tape and distribute the short fibers generously on the top. Then press very firmly, the over- Carefully brush off excess fibers with your fingers and cover any empty areas.

Roughly quarter the tape when it is approx. 30 cm wide. Wrap the underside of the piece of tape around a toothpick and use a little white glue if necessary. When the package is ready, pull out the toothpick and press the package into shape.

Even more fibers can be picked up with very little glue.

Finally, tie the bales with thin twine and decorate them.
